

SNOWFLAKE FOR THE CFO OFFICE

FIELD ENABLEMENT ACTIVATION

Q3 FY27

Agenda

- **The Focus:** Why CFOs, Why Now
- **The Challenge:** What's on the CFO's Mind
- **Core Plays:** What to Sell and How to Sell
Solution Plays + Business Outcomes
- **Story from the Field** with the ZScaler Team
- **Dream Team:** Who to Bring In & When
- **Call to Action:** What you can today

Selling to the C-Suite: Intro to the Series

Field activation series in Q3

CFO

August 25

CMO

September

CRO

October

Session: Includes executive insights, outcome-led selling, story from the field, and a practical playbook

Post-Session: Yoodli exercise to practice your outcome-led discovery with the C-Suite.

Goals: Increase opportunities and use cases with the office of the CFO, CMO, and CRO throughout H2.

OUTCOME-LED SELLING TO THE CFO

SERIES SPONSOR + OUTCOME-LED SELLING MANDATE

**JONATHAN
BEAULIER**
Chief Revenue Officer

Evolve from Selling Features to Outcomes

Feature-led Selling Approach

Outcome-led Selling Approach

WHAT'S ON THE CFO'S MIND

**DOUG
GALLAGHER**

Sr. Director,
Value Advisory & Bid Management

Understanding your CFO Buyer

Chief Financial Officer

- 01 Steward of the business
- 02 Strategic advisor to CEO
- 03 Guardian of trust

What They Ask

- Will this drive profitable growth?
- Can I trust the numbers?
- Can we operate more efficiently?
- Does this reduce business risks?

What They're Looking For

- Revenue growth, margin improvement, ROI
- Accurate data, forecasting, executive insights
- Automation, productivity, faster planning & close
- Governance, compliance, controls

How Are They Measured

- ↑ Revenue
- ↑ Cash Flow
- ↑ Forecast Accuracy
- ↑ Productivity
- ↓ Risk
- ↑ Regulatory Compliance

Common Challenges Facing CFO Org Today

Challenges impacting decisions and performance

CFO Org
CHALLENGES

Spreadsheet Dependency

Fragmented Enterprise Data

Delayed Financial Visibility

Slow Decision Support

Unreliable Forecasting

Finance Agility Constraint

Org Change Drives Rework

Growing Governance & AI
Readiness Requirements

IMPACT

Spend too much time on
operations instead of strategy

Leadership makes slower and
less confident decisions

Lower forecast accuracy and
financial performance

Higher operating costs and
business risk

Limited ability for the CFO to
act as a strategic business
partner

CFO Mandate Has Evolved with AI

From financial steward to strategic architect of growth through AI

87%

of CFOs believe AI will be extremely or very important to their finance department's operations¹

82%

of CFOs are concerned about AI token consumption and costs²

1. Deloitte - Technology Transformation Emerges as a Top Priority for CFOs in 2026
2. EY - The reckoning over AI cost and value has begun

How AI is expanding the CFO agenda

What They Ask

Will this drive profitable growth?

Can I trust the numbers?

Can we operate more efficiently?

Does this reduce business risks?

AI-Era CFO Questions

Will this AI investment deliver measurable ROI?

Can I trust AI to make or recommend decisions?

How does AI multiply my team productivity?

How do we govern AI usage, data, and token spend?

New Themes

AI ROI

AI Productivity

Tokenomics

AI Governance & Trust

Enterprise AI/Data Readiness

THE CORE CFO PLAYS: WHAT & HOW TO SELL

**JAMES
MCGEEHAN**
RVP,
Global Industry GTM Lead,
Financial Services

Priority Use Cases

Long Range Plan Forecasting

Financial forecasting and analysis to inform strategic growth, capital allocation, revenue targets, OPEX/CAPEX

FP&A

Financial Close Analyses

Fluctuation (flux) analysis and variance analysis ensure financial statements are accurate and compliant

Accounting

FP&A

SEC disclosures and Earnings prep

Closed / historic financial analysis and results for public earnings releases, regulatory filings (10-Q, 10-K, 8-K)

IR

Accounting

FP&A

LONG RANGE PLAN FORECASTING

Long Range Forecasting: Use Case Overview

Description

Long Range Planning (LRP): Analysis of high-level, macro drivers that evaluates how strategic decisions today will impact revenue, profitability, cash flow, and enterprise value over the next 5-10 years.

- Multi-year projections across revenue, P&L, balance sheet, free cash flow
- Multi-year strategies, including growth goals) with assumptions and scenario modeling
- Long-term investments, including capital expenditures, product expansion, M&A and strategic initiatives

Data Sources & Data Types

Long Range Forecasting: Challenges + Pain

WORKFLOW CHALLENGES

Time spent on data collection, across different teams and systems

Multiple spreadsheets, difficult to maintain, scale

Manual, error-prone model and scenario updates

Scenarios limited by time and FP&A capacity

Limited visibility into assumptions, changes, and planning history

Delayed insights vs. rapid market and business changes

... CREATE BUSINESS CONSEQUENCES

- ✗ Slower investment decisions
- ✗ Fewer strategic scenarios evaluated
- ✗ Lower confidence in forecasts
- ✗ High FP&A overhead
- ✗ Plans become outdated before execution

Long Range Forecasting: Solution + Outcome

Snowflake Solution

Customer Outcomes

- Evaluate more strategic scenarios
- Faster plan-generation turnaround
- Accelerate executive decision-making
- Reduced planning cycle time
- Reduced operational Risk
- Elimination of manual Excel workflows

Snow-on-Snow

~1 Week: Reclaimed on every scenario build (takes <5 minutes to run)

\$5K: Savings in overhead to run each scenario

50: Spreadsheets consolidated into a single Streamlit app

Unlimited: Scenarios Analyzed

Long Range Forecasting: Sales Cheat Sheet

Key Personas

- Head, VP of Financial Planning & Analysis (FP&A)
- VP of Corporate Strategy
- Director, Corporate FP&A
- Lead Strategic Finance Analyst
- Corporate Development Manager / Associate
- M&A Strategy Lead

Business Outcome Discovery:

- What major business decisions depend on your long-range plan today?
- When leadership wants to pressure-test a new assumption or strategy, how quickly can finance give them an answer?
- Are there decisions where you'd like to evaluate more scenarios than your team has the time or capacity to model today?
- What would faster, more flexible scenario planning enable the business to do differently?

GOAL: Champion + Pain + Metrics → Workshop with Partner and Snowflake Team

FINANCIAL CLOSE ANALYSES

Financial Close Analyses: Use Case Overview

Description

The comprehensive evaluation process conducted at the end of an accounting period to verify financial data accuracy, reconcile balance sheet accounts, explain variances, and finalize formal financial statements.

Key components include:

- **Fluctuation (flux) analytics:** Compares actuals vs. prior period actuals and conducted by the accounting team
- **Variance analysis:** Compares actuals vs. plan (budget vs. forecast) and conducted by the FP&A team

Data Sources & Data Types

Financial Close Analyses: Challenges + Pain

WORKFLOW CHALLENGES

Data needed to analyze variance sit across multiple systems & sources

Commentary and documentation are inconsistent and difficult to standardize

Limited visibility to historical explanations, recurring issues, and approval status

Lack of standard definitions across teams

Highly manual effort to prepare, reconcile, and validate data

... CREATE BUSINESS CONSEQUENCES

- ✗ Longer financial close and reporting cycles
- ✗ Significant manual effort
- ✗ Increased audit effort
- ✗ Slower decisions and missed opportunities
- ✗ Erosion of credibility for Finance in front of investors and analysts

Financial Close Analyses: Solution + Outcome

Snowflake Solution

Customer Outcomes

- Live visibility, zero data refresh lag
- Less manual investigation
- Earlier variance detection for faster corrective action
- Faster root cause analysis
- Confidence and trust in numbers and explanations
- Less Time to financial close

Snow-on-Snow

- 6~7 hours:** Data assembly time reclaimed on every close
- <5 minutes:** Variance driver explained
- 1 hour:** Quarter-end & earnings prep, from ~2 weeks
- 2 weeks:** Prototyped deployed, full app built in 1 month

Flux Analysis: Sales Cheat Sheet

Key Personas

- Head, VP of Financial Planning & Analysis (FP&A)
- Senior Accountant / Senior GL Accountant
- Assistant Controller
- Dir, Mgr of Financial Reporting
- Internal Audit Manager / Senior Auditor
- SOX Compliance Manager

Business Outcome Discovery:

- How many days of your financial close cycle are currently consumed by researching and reviewing balance sheet fluctuations?
- When executive leadership or the CFO asks for the root cause behind a material balance change, how quickly can your team deliver drill-down context today?
- How much time does your team spend manually pulling transaction-level data out of ERPs into Excel just to investigate a single variance?
- How confident are you that your current flux review process leaves a fully traceable, SOX-compliant audit trail across all subsidiaries?
- What would centralizing your trial balances, subledgers, and audit trail into a single source of truth enable your accounting team to do differently?

EARNINGS PREP

Earnings Prep: Use Case Overview

Description

Earnings Prep: The structured quarterly process of synthesizing financial actuals, variance drivers, guidance, and strategic narratives to prepare executive leadership for public market disclosure.

- Automated aggregation of financial actuals, segment metrics, non-GAAP reconciliations, and forward guidance
- Cross-functional alignment across Investor Relations, Financial Reporting, FP&A, Legal, and Corporate PR
- Generation of earnings press releases (8-K), CEO/CFO scripts, decks, briefs

Data Sources & Data Types

Earnings Prep: Challenges + Pain

WORKFLOW CHALLENGES

Time spent manually stitching GL actuals, consensus, and FP&A models

Multiple spreadsheets, difficult to maintain, scale

Manual, error-prone updates to press releases, scripts, and 10-Q footnotes

Scenarios limited by time and FP&A capacity

Limited visibility into assumptions, changes, and planning history

Delayed insights vs. rapid market and business changes

... CREATE BUSINESS CONSEQUENCES

- ✗ Risk of disclosure errors & SEC comment letters
- ✗ Unpolished earnings call responses & Q&A stumbles
- ✗ Lower investor & market confidence
- ✗ Narratives disconnect from actual operational results

Earnings Prep: Solution + Outcome

Snowflake Solution

Customer Outcomes

Move away from extensive manual preparation pulling together information from multiple sources for quarterly earnings.

Automate with AI-supported coding: Use natural language using Cortex Code to automate the E2E process for preparing executives for earnings.

Analyze multiple data sources: Bring together external data, including competitor earnings results, market data, and internal data, including key KPIs across different teams.

Streamline key workflows with AI: Predict analyst questions with AI and ML, and generate briefing documents for executives.

Earnings Prep: Sales Cheat Sheet

Key Personas

- Head / VP of Investor Relations (IR)
- Director / VP of Financial Reporting
- VP / Director of Corporate FP&A
- Corporate Legal Counsel / SEC Attorney
- Head of Corporate Communications / PR

Business Outcome Discovery:

- How long does it take your IR and Financial Reporting teams to reconcile GL actuals with earnings materials after close?
- When executive leadership needs to drill into a line-item variance during earnings script prep, how quickly can Finance provide an answer?
- Are there quarters where you'd like to prepare more scenario-based analyst Q&A prep than your team currently has time for?
- What would automated metric single-source-of-truth enable your IR and leadership team to do differently during earnings week?

Key Takeaways

Bottoms Up Momentum

- Sr Director level buy-in for his org, users hands on in hackathon.
- Enterprise IT support for onboarding of new teams ie FP&A, Order to Cash, Procurement, etc

Top Down Alignment

- CFO/CAO alignment on enterprise strategic approach to Finance reporting
- CIO buy-in on centralized support

Leveraging the Right Teams

- Accenture GSI
- Snowflake Finance team
 - Leadership
 - Analytics lead
- Snowflake AI Specialists
 - Get hands on

Zscaler FP&A AI Use Cases

Nine AI-driven initiatives modernizing finance from retrospective reporting to proactive decisioning

FP&A Reporting Automation

AI Chatbots deliver instant insights on ACV Margin, R&D and more...

Decision DNA

Casual, geo-aware engine: Billings drivers, what-ifs and risk alerts

Customer Master Intelligence

Reconciles SFDC & NetSuite, Customer 360; saves 300+ hrs/qtr

Financial Reporting Engine

LLM-driven: moves leaders from 'what' to 'why' happened

Renewals & Churn Self-Serve

Democratizes churn/renewal reporting; no analyst wait

Opex Reconciliation

Standardizes Opex review; variance, risk & opportunities

Commissions Forecasting

Automates forecast & variance by GEO/Area for CTB & ACV

Leading-indicator Intel

F500/G2000 signals + usage; whitespace & renewal foresight

T&E Expense Narrative

Personalized real-time expense insights via on-demand PDF's

WHO TO BRING IN

Which Specialists Should You Engage?

First point of contact for unified Industry, Product, and Value expertise

CUSTOMER OBJECTIVE & KEY QUESTIONS

INITIAL POINT OF CONTACT

Business Discovery & Alignment

- What should we do?
- What business outcomes matter for this?

Industry GTM

Technical Strategy & Solution Design

- What is the technical objective?
- How would Snowflake deliver this?

AI Product Specialist

Financial & Operational Justification + Tokenomics

- Is this worth funding?
- Why this over other initiatives?

Value Advisory

Why SIs Are the Key to the CFO

The CFO is the hardest persona to unlock — partners already have access

How Partners Help

- Insight into board-level initiatives
- Long-standing CFO access & relationships
- Speak the language of the CFO
- Bridge legacy tech to Snowflake
- Deliver end-to-end financial transformations and embedded through Tax, M&A (and Audit) services
- Tailored discovery offerings, out-of-the-box solutions & investments for joint workshops / MVPs

How to Engage

- Inquire on your partners relationship with the CFO
- Proactively build and share a PoV of Snowflake for Finance with the partner - ask for feedback!
- Collaborate with PSMs to identify applicable partner discovery offerings, tools and investment opportunities
- Take the first customer meeting together to strengthen credibility

In most cases SIs already advise the CFO — use them to build the relationships that win Finance Transformation.

CALL TO ACTION

Use the CFO Playbook

Prompt Raven/CoWork to Quickly Identify Use Cases & Prepare for Discovery

Access the CFO Playbook on Compass

STEP 5

Select One Office of the CFO Play

Objective: Only after discovery, select ONE primary play. Score ALL financial use cases (the three priority use cases — Long Range Plan Forecasting, Financial Close Analyses, SEC Disclosures & Earnings Prep — plus all secondary plays) and select the one that best matches the discovered pain. A secondary use case is equally valid when it fits better.

Play Guide

Customer Evidence	Play	Likely Owner	Metric
Slow or stale forecasts	Continuous forecasting	VP FP&A	Speed and accuracy
Spreadsheet-based scenarios	Scenario planning	Strategic Finance	Scenario cycle time
Manual close, flux, or reconciliation	Close automation	Controller	Close days and effort
Multiple entities and ERPs	Group consolidation	Group Finance	Consolidation cycle
Unclear AI spend and value	AI cost governance	CFO or AI owner	Cost by outcome
Fragmented major-project visibility	CapEx and project finance	CFO or Treasury	Budget, delay, leverage
Manual earnings preparation	Earnings and IR	FP&A or IR	Preparation time
Spend leakage or questions	T&E and spend	Controller or Procurement	Leakage and exceptions

Prompt to run — Acquisition

Help me identify the best acquisition accounts for an Office of the CFO sales motion.

INPUT

Use my territory or account list (or provide a filtered list of accounts to review)

GOAL

Recommend three accounts where we can open a NEW conversation with the Finance organization (the Office of the CFO - CFO, Controller, FP&A, Treasury, Tax, Internal Audit, Procurement, or Investor Relations), and where a Finance leader could become an active business sponsor, not only a budget approver. Prioritize accounts where there is NOT already an active Finance / Office-of-the-CFO engagement - this is about breaking into Finance, not continuing a conversation already in flight.

EVALUATE EACH ACCOUNT FOR:

1. Finance mandate - margin, cash flow, cost reduction, forecasting, AI ROI, audit, regulatory, Finance transformation, operating efficiency, or unit-economics priorities.
2. Finance complexity - multi-entity/multinational ops, M&A, complex revenue, major CapEx, high transaction volume, treasury complexity, regulatory pressure, investor reporting.
3. Data and process friction - multiple ERP/EPM/BI/Finance systems; spreadsheet-dependent processes; manual reconciliation; fragmented data; AI initiatives without a data foundation.
4. Trigger events - new CFO/Finance leader, earnings pressure, restructuring, M&A, IPO readiness, major CapEx, AI announcements, regulatory change, ERP/Finance transformation.
5. Finance sponsor potential - is the outcome owned by a Finance leader, visible to board/investors, and does it need cross-functional sponsorship?
6. Open whitespace - confirm there is NO active Finance / Office-of-the-CFO engagement or in-flight Finance/renewal conversation today. An existing Data/IT or other-LOB relationship is acceptable as a warm path in, but not an active Finance conversation.
7. Working Office of the CFO play hypothesis - select one to validate (see Play List).

SCORE EACH ACCOUNT FROM 0 TO 100:

- Finance mandate urgency: 25
- Finance complexity: 20
- Data/process friction: 15
- Trigger and timing: 15
- Open whitespace: 10
- Play fit: 8
- Access path: 7

RETURN:

- Top three accounts and five backups
- Finance priority and supporting evidence
- Working Office of the CFO play hypothesis
- Preliminary value hypothesis
- Suggested first-meeting ask
- Score and reason to prioritize
- Confirmation no active Finance engagement
- Likely Finance owner, econ buyer, tech owner
- Metric to validate
- Recommended proof point
- Assumptions and confidence level

RULES

- Do not invent facts. Separate evidence from inference. Mark missing info "to validate."
- Do not select an account only because it is large, or only because there is an active CFO/renewal conversation - the goal is to OPEN a new Finance conversation.
- Target the broader Finance department, not the CFO alone.
- Do not make a final Office of the CFO play selection before discovery.
